Jesús Abdiel Moreno

Veraguas, Panama • linkedin.com/in/jezmn • github.com/jezmn

Professional Summary

Backend & DevOps Engineer driven by a deep curiosity for how systems work at every level. I focus on infrastructure automation, containerization and production deployments, with a preference for minimalist and maintainable solutions. I actively contribute to open source and constantly look for better ways of doing things.

Experience

Freelance Project (Logistics Company) Panama
DevOps & Backend Developer September 2025 – Present

- Deployed the main application with Kamal and kamal-proxy, using GHCR as image registry for zero-downtime releases.
- Set up a self-hosted GitHub Actions runner on the VPS, configuring user permissions, SSH access and registry credentials so Kamal can build, push and deploy containers from the pipeline.
- Configured and maintained the CRM deployment on a VPS using Docker Compose and Traefik as reverse proxy.
- Implemented Cloudflare Tunnel to expose services without opening ports, and managed DNS and redirect rules.

Freelance Project (Beauty Salon) Panama
DevOps Engineer January 2026 – March 2026

- Managed DNS, SSL/TLS and security with Cloudflare, exposing services through Cloudflare Tunnel and Traefik with no public ports.
- Provisioned and hardened a Hetzner Cloud server (firewall rules, SSH key authentication) and deployed a self-hosted Supabase instance behind Nginx.
- Built CI/CD pipelines with GitHub Actions and self-hosted runners, deploying with Docker Swarm for zero-downtime releases.
- Integrated the TiloPay payment gateway and automated transactional emails with Brevo SMTP.

Congreso Internacional de Ciencia, Innovación y Tecnología (COICIT) Panama
Full-stack Developer September 2025 – October 2025

- Developed and maintained a registration system using React, Node.js, Express, and MongoDB.
- Improved application security through data validation and vulnerability fixes.
- Deployed the system and configured the production environment using Cloudflare.

Technical Projects

Ansible Hardened Docker Host **github.com/jezmn/ansible-hardened-docker-host**

- Published an Ansible Galaxy collection to provision and harden Docker hosts.
- Includes SSH hardening, UFW, Fail2Ban, kernel sysctls, unattended upgrades, and Docker CE.
- Tested with Molecule and ansible-lint in CI, including SSH rollback.

Agent-sandbox – Filesystem Isolation for AI Coding Agents **github.com/jezmn/agent-sandbox**

- Built a Linux launcher using Bubblewrap to limit AI coding agents' filesystem access.
- Added read-only and read-write mounts and masking for sensitive files.
- Tested mounts and command execution; added dry-run inspection.

OR Solver – Operations Research Web Solver **github.com/jezmn/or-solver**

- Web-based Operations Research solver with interactive step-by-step solutions.
- Implements methods for Linear Programming, Integer Programming, Transportation, Assignment, Goal Programming and Sensitivity Analysis.
- Built with FastAPI, Alpine.js, Tailwind CSS and interactive charts.

Hanesu – Experimental workflow layer for AI coding agents **github.com/jezmn/hanesu**

- Based on structured development processes, aimed at improving consistency in AI-assisted coding tasks.
- CLI tool published on npm that sets up task tracking, phases, artifacts and quality gates.
- Helps AI agents work more predictably on complex or multi-step tasks.

Education

Technological University of Panama (UTP)

- Bachelor's Degree in Software Development

Technical Skills

- **Languages:** TypeScript, JavaScript, Python, SQL, Bash
- **Backend Frameworks:** NestJS, Express.js, FastAPI
- **Frontend Frameworks:** Vue.js, Astro, Alpine.js
- **Infrastructure:** Linux, Hetzner Cloud, AWS, Nginx, Traefik, Cloudflare
- **DevOps:** Docker, Kamal, Ansible, OpenTofu, Git, CI/CD (GitHub Actions)
- **Databases:** PostgreSQL, MariaDB, MongoDB, SQLite
- **ORMs:** Drizzle, Prisma
- **Security:** Server Hardening, SSH, Firewalls

Development Environment

- Arch Linux · Hyprland · kitty · Zed · KeePassXC · OpenCode

Soft Skills

- Self-learning and adaptability
- Open source contribution and community collaboration
- Problem-solving and analytical thinking
- Clear communication
- Responsibility and ownership

Languages

- Spanish (Native)
- English (A2-B1)

Achievements

First Place – HACK4EDU VII (Senior Category) – 2026 **github.com/jezmn/aprendemas**

- Winning team project **Aprende+**: offline English tutor for kids powered by local LLMs.

First Place – IHCAVA (Agroindustrial Innovation Ideathon & Hackathon) – 2026

- Member of the winning team, developing a technological solution for an agroindustrial innovation challenge.

Third Place – BDO Tech-Qure Challenge (CTF, powered by Hackrocks & ITCqur Cyber Solutions) – 2026

- An international cybersecurity Capture the Flag competition.

Certifications

Participation Certificate, 7th Copa Airlines Hackathon – Copa Airlines Oct 2026

- DevOps, API & Observability

Fundamentos de AWS: Cloud, Serverless y Operación – Commit Academy Sep 2026

- Credential ID: cert_fRnCsTzJE9
- https://www.commitacademy.io/app/verify-certificate/cert_fRnCsTzJE9

Community Involvement

- Volunteer instructor in educational robotics with Arduino for students at La Primavera School.
- Speaker at a university clinic on personal information security, covering password management best practices and digital privacy.
